CAREER OBJECTIVE

CAREER OBJECTIVE

B.Tech Computer Science (AI & ML) undergraduate with learning experience in data structures, algorithms, and machine learning, demonstrated through solving 145+ DSA problems and building ML systems on real-world datasets. Interested in developing efficient and scalable software solutions.

TECHNICAL SKILLS

Programming: Python, Java

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Machine Learning: Supervised, Unsupervised Learning, Regression, Classification, Clustering

Deep Learning: Neural Networks, CNNs, Backpropagation, Model Training

Prompt Engineering: LLM prompt design and structured query formulation

Data Analysis: Data Cleaning, Preprocessing, Feature Engineering, EDA

Model Evaluation: Cross Validation, Accuracy, Precision, Recall, F1-score

Tools & Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, PyTorch, Docker

Database: MySQL, SQL

PROJECTS

Smart India Harvest – Crop Yield Prediction System

- Developed a machine learning model to predict crop yield using agricultural and environmental datasets (1000+ records)
- Applied feature engineering and regression techniques to improve prediction accuracy and reliability
- Built an end-to-end pipeline for preprocessing, training, and evaluation, reducing manual effort by ~40%

Interview Bot – Speech-Based Interview Practice System

- Built a speech-to-text based application to simulate real interview scenarios
- Designed structured response analysis and automated follow-up question generation
- Enhanced feedback consistency and usability through automated evaluation logic

Urban Air Quality Analysis & Prediction System

- Analyzed and modeled air pollution datasets (PM2.5, NO₂) using machine learning techniques
- Performed exploratory data analysis and visualization to identify pollution trends
- Developed predictive models to forecast air quality levels and support data-driven insights

PROBLEM SOLVING

- Solved 145+ Data Structures and Algorithms problems on LeetCode covering arrays, recursion, dynamic programming, and graphs
- Regularly practicing competitive programming to improve coding efficiency and problem-solving approach

CERTIFICATIONS & ACHIEVEMENTS

- Claude-101 Certification (AI tools and practical usage)
- AI Fluency: Framework and Foundations (core AI concepts)
- AI-ML Virtual Internship (Google for Developers & EduSkills, AICTE Initiative)
- GeeksforGeeks – 160 Days of Coding Challenge

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML) 2023 – 2027

IMS Engineering College (IMSEC), AKTU

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Machine Learning, Probability & Statistics, Software Engineering

CGPA: 7.0
