CAREER OBJECTIVE

B.Tech CSE (AI & ML) undergraduate at IMSEC-AKTU, proficient in Python, PyTorch, Scikit-learn, and LLM integration, with hands-on project experience in end-to-end ML systems and intelligent application design. Seeking an AI/ML internship to contribute to model development, data pipelines, and production-ready AI solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering

Deep Learning: Neural Networks, CNNs, Backpropagation, Model Training & Evaluation

ML Frameworks & Libraries: PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn

LLM & Generative AI: LLM Integration, Prompt Engineering, Ollama (LLaMA 3), RAG Concepts

Backend & DevOps: FastAPI, REST API Design, Docker, Docker Compose

Data Skills: EDA, Data Cleaning, Preprocessing, Cross-Validation, Precision/Recall/F1

Core CS & Databases: DSA, OOP, DBMS, MySQL

PROJECTS

AI Code Review & Optimization Engine github.com/vishishodia/code-review-ai

Technologies: Python, FastAPI, LLaMA 3 (Ollama), Docker, Docker Compose, REST API

- Built a static analysis engine to detect inefficient code patterns and estimate time complexity from $O(1)$ to $O(n^3)$ using rule-based analysis across modular components.
- Integrated LLaMA 3 via Ollama for context-aware optimization suggestions; modular FastAPI backend separates analysis, complexity estimation, and AI suggestion layers.

AI Resume Screening System github.com/vishishodia/AI-Resume-Screening-System

Technologies: Python, NLP, Sentence Transformers, Streamlit, PyPDF2

- Built an NLP-powered ATS app that parses PDF resumes, extracts skills, and computes semantic similarity via Sentence Transformers to generate ATS compatibility scores against job descriptions.
- Developed a Streamlit interface for real-time analysis, matched/missing skill detection, and candidate ranking.

Smart India Harvest – Crop Yield Prediction

Technologies: Python, Scikit-learn, Pandas, NumPy, Regression Modeling

- Developed an end-to-end ML pipeline for crop yield prediction from 1,000+ agricultural records; reduced manual data processing by ~40% through automated preprocessing and feature selection.

Urban Air Quality Analysis & Prediction github.com/vishishodia/AirQualityProject

Technologies: Python, Scikit-learn, Matplotlib, Seaborn, Supervised ML, EDA

- Performed EDA on PM2.5 and NO2 datasets to uncover pollution trends; trained classification and regression models to forecast AQI levels for data-driven environmental insights.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (AI & ML) 2023 – 2027

IMS Engineering College (IMSEC), Affiliated to AKTU | CGPA: 7.0

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Machine Learning, Probability & Statistics, Software Engineering

CERTIFICATIONS & ACHIEVEMENTS

- Google for Developers & EduSkills (AICTE Initiative) — AI-ML Virtual Internship
- IBM SkillsBuild — Artificial Intelligence Fundamentals
- Anthropic — Claude-101 Certification
- AI Fluency: Framework and Foundations — Core AI/ML Concepts and Applications
- Kestra Fundamentals Certification — Workflow Orchestration & Automation
- GeeksforGeeks 160-Day Coding Challenge — Consistent daily problem-solving streak
